Experience
I don't have commercial experience. I am studying Computer Science in the university and learning DSA and C++ by myself. I have some pet-projects.

Projects
Terminal (console) game, snake's analogue — dec'23 - present
Implementation on C++.

Service for finding industrial practise for summer — feb '24 - present
Development of architecture with C4-notation.

Chat-bot (telegram) for equipment delivery for photostudio — mar '24
Back-end development, now on stage of making mvp.

Implementing own system call on xv6, making bootloader — oct '24
C, 'Operating Systems' study projects.

Web dictionary to search and learn words — oct '24 - feb '25
Python, SQL / ElasticSearch (now on the stage of concept).

Secret Santa service — nov '24
Python, PostgreSQL, FastApi (implemented).

Education
4th year of "Computer science and engineering" SUAI, Saint-Petersburg
Exchange programme to BIT, Beijing. (Algorithms, Operating systems)
Active studying DSA on leetcode, C++
Course on C++ by CSC on Stepik

Skills
Working in the team, organisation & managing the projects, constant motivation of learning something new, dedication

Stack of technologies
C/C++, Python, Git, Linux (console), SQL.

Languages
Russian (native), English (B2 FCE-proven), Norwegian (A2/B1)
